

Community Health Worker *Health Science Career Pathway*

A Community Health Worker is a trusted member of the community she or he serves who assists individuals and communities to adopt healthy behaviors. Learn to conduct outreach for medical personnel or health organizations to implement programs in the community that promote, maintain and improve individual and community health.

About The Program:

The Community Health Worker non-credit training program combines classroom instruction with service learning in the community. The program includes 108 classroom hours and 60 service learning hours. Classroom instruction will take place at the Harrison Education Center located at 3140 Cass Avenue. Students must be available from 8:00 a.m. to 5:00 p.m., Monday through Friday.

Cost of Program:

All instructional materials for this program are entirely grant funded.

Community Health Experience:

Some degree and certificate programs offered by the college require students to obtain community health service learning experience as part of their course work. Hospitals and health facilities may mandate that a criminal background check and/or drug screening check be conducted prior to placement in a healthcare setting and as part of an employer's screening process. Students not passing these checks may be prohibited from participating in the community health service learning experience thus rendering the student ineligible to satisfactorily meet the course/program requirements, and/or ineligible for hire.
